

Acer palmatum 'Sangokaku'

Výška	2-3 m
Šírka	3-8m
Koruna	broad ovoid, dark, dense crown, capricious growing
Kôra a vetvy	brown, grey
Listy	green
Jesenné sfarbenie	Žltá, Oranžová
Kvety	red, flowers in May
Plody	red
Trne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	clay soil, loamy soil, sandy soil, peaty soil, acid soil
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	6 (-23,3 do -17,8 °C)
Ostatná odolnosť	Odolné mrazu (WH 1-6)
Použitie	stromy do nádob, strešné záhrady, malé záhrady, dvory
Tvar	Vysokokmeň, Viackmeň

Acer palmatum 'Sangokaku' is a small tree that can eventually grow about 10 m tall. However, it usually remains a large shrub. The crown is broad ovoid to inverted ovoid. Most striking feature of 'Sangokaku' are its brilliant intense coral-red winter twigs. In summer, the twigs, which are then greenish-yellow, are barely noticeable. The leaves are 5-lobed and bright green. In autumn, the leaves turn a deep golden yellow before falling off and revealing the colourful winter twigs in their full glory. Not only the colourful twigs, but also the beautiful autumn colours are an important ornamental value of 'Sangokaku'. If young twigs do not ripen sufficiently in the autumn, they may die off completely or partially. In older trees, the young twigs are less conspicuous, but new, colourful twigs are formed after light pruning. Was introduced by Ireland's Daisy Hill Nurseries around 1920. 'Sangokaku' is sometimes still referred to with the synonym 'Senkaki'. Hardiness zone: 6
