

Acer platanoides 'Cucullatum'

Výška	6-8 m
Šírka	5-7m
Koruna	broad ovoid, dark, dense crown
Kôra a vetvy	grey
Listy	green
Kvety	yellowgreen, flowers in April
Plody	brown, inconspicuous
Tríne	Žiadny
Jedovatosť	Má jedovaté časti
Typ pôdy	clay soil, loamy soil, sandy soil
Pôdna vlhkosť	Odolné voči krátkodobému zaplaveniu
Spevnené plochy	Toleruje čiastočné spevnenie
Zóna odolnosti	4 (-34,4 do -28,9 °C)
Odolnosť voči vetru	good; cannot tolerate sea wind
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Cenné pre motýle
Tvar	Vysokokmeň

Medium-size tree that has the habit and leaf colour of the species. However, the leaves are very crinkled so that the short lobes sometimes overlap. As a result, the leaf is spherical and often looks rather misshapen. 'Cucullatum' is a little known cultivar and is primarily a park tree. The oddly shaped leaves are its only decorative value, and might be deemed intriguing rather than attractive. Grows on any soil, but does not tolerate stagnating groundwater and peaty soils.
