

## Acer rubrum 'Bowhall'

|                                   |                                                     |
|-----------------------------------|-----------------------------------------------------|
| <b>Výška</b>                      | 12-15 m                                             |
| <b>Šírka</b>                      | 5-8m                                                |
| <b>Koruna</b>                     | narrow conical, dark, dense crown                   |
| <b>Kôra a vetvy</b>               | grey                                                |
| <b>Listy</b>                      | green                                               |
| <b>Jesenné sfarbenie</b>          | Oranžová, Červená                                   |
| <b>Kvety</b>                      | red, flowers in March                               |
| <b>Plody</b>                      | red, inconspicuous                                  |
| <b>Tríne</b>                      | Žiadny                                              |
| <b>Jedovatosť</b>                 | Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá |
| <b>Typ pôdy</b>                   | loamy soil, sandy soil, acid soil                   |
| <b>Spevnené plochy</b>            | Toleruje čiastočné spevnenie                        |
| <b>Zóna odolnosti</b>             | 4 (-34,4 do -28,9 °C)                               |
| <b>Odolnosť voči vetru</b>        | bad                                                 |
| <b>Ostatná odolnosť</b>           | Odolné mrazu (WH 1–6)                               |
| <b>Stromy pre zvieratá a hmyz</b> | Odolné mrazu (WH 1–6), Cenné pre včely (medonosné)  |
| <b>Použitie</b>                   | bulváre a široké ulice, úzke ulice                  |
| <b>Tvar</b>                       | Vysokokmeň                                          |

A somewhat older, American selection reaching circa 15 m. The crown is narrow pyramidal, making it a perfect tree for application in avenues. Young twigs are red-brown, the leaf stalk of the bright green 10 cm leaf is also red-brown. The underside of the palmate leaf is blue-green. Autumn colouring in orange-red hues. The red flowers emerge before the leaves unfurl. The tree develops a sturdy main root with fibrous root branches. In dry, limy soil the growth stunts and the autumn colouring will not occur. Intolerant to (sea) wind. 'Bowhall' shows a strong resemblance to *A. freemanii* 'Armstrong' but remains slightly shorter and has a more dense crown. The autumn colouring is more intense too. Winter hardiness zone: 4
