Young specimen are very narrow, mature wider. An ideal tree for narrow streets and avenues. Height up to 15 m. A selection with strikingly red-brown coloured twigs. The leaf stalk is red-brown too. The leaf is bright green and can be 10 cm. The underside of the leaf is blue green. Eye-catching yellow to red autumn colours. It is a male variety without flowers or fruits. In limy soil the growth stunts. No autumn colouring in dry soils. Poor tolerance to (sea) wind. Winter hardiness zone: 4
