

Acer rubrum 'Scanlon'

Výška	10 - 12 m
Šírka	3-4m
Koruna	columnar, dark, dense crown
Kôra a vetvy	twigs reddish brown, bark grey
Listy	palmate, lobed, glossy green, leaf stem red, about 10 cm, autumn colour orange to purple
Jesenné sfarbenie	Oranžová, Fialová
Kvety	red, in small umbels, March/April
Plody	winged nut, (samara), about 2 cm
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	moist, not calcareous
Spevnené plochy	Toleruje čiastočné spevnenie
Zóna odolnosti	4 (-34,4 do -28,9 °C)
Odolnosť voči vetru	bad
Ostatná odolnosť	Odolné mrazu (WH 1–6)
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Cenné pre včely (medonosné)
Použitie	bulváre a široké ulice, úzke ulice
Tvar	Vysokokmeň, Viackmeň
Pôvod	Scanlon Nursery, Olmsted Falls, OH, USA, 1956

Medium-sized tree with a compact and narrow columnar crown. Height 10 to 12 m. Spread circa 4 m. Branching usually low. Perfect street and avenue tree. Trunk grey, young twigs are red-brown. The leaf stalk is red too. The leaf is shiny green and 10 cm. The underside is blue-green. Autumn colours in purple and orange hues. The red flowers appear before the leaves. The tree develops a sturdy main root with many fibrous rootlets. In limy and dry soil the growth is stunted and no colouring in autumn will take place. Also in heavy clay soil the growth is moderate. Poor tolerance to (sea) wind. Winter hardiness zone: 4 *Acer rubrum* 'Scanlon' forms a densely branched crown. 'Scanlon' is one of the best American selections of the red maple.
