

## Acer rufinerve

|                                   |                                                                  |
|-----------------------------------|------------------------------------------------------------------|
| <b>Výška</b>                      | 9 - 12 m                                                         |
| <b>Šírka</b>                      | 5-6m                                                             |
| <b>Koruna</b>                     | wide vase-like shaped, light, open crown, capricious growing     |
| <b>Kôra a vetvy</b>               | green with white-grey stripes                                    |
| <b>Listy</b>                      | palmate, dark green, 5 - 15 cm                                   |
| <b>Jesenné sfarbenie</b>          | Žltá, Červená                                                    |
| <b>Kvety</b>                      | yellow-green, in corymbs, April/May                              |
| <b>Plody</b>                      | winged nutlets                                                   |
| <b>Térne</b>                      | Žiadny                                                           |
| <b>Jedovatosť</b>                 | Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá              |
| <b>Typ pôdy</b>                   | lightly acid, permeating but not dry                             |
| <b>Spevnené plochy</b>            | Netoleruje spevnené plochy                                       |
| <b>Zóna odolnosti</b>             | 6a (-23,3 do -20,6 °C)                                           |
| <b>Odolnosť voči vetru</b>        | good                                                             |
| <b>Ostatná odolnosť</b>           | Odolné mrazu (WH 1–6), Odolné vetru                              |
| <b>Stromy pre zvieratá a hmyz</b> | Odolné mrazu (WH 1–6), Odolné vetru, Cenné pre včely (medonosné) |
| <b>Použitie</b>                   | stromy do nádob, malé záhrady                                    |
| <b>Tvar</b>                       | Vysokokmeň, Viackmeň                                             |
| <b>Pôvod</b>                      | Japan                                                            |

A large shrub that may grow into a multi-stemmed tree. The loose habit generates an open, vase-like shaped crown. The tree can reach 10 m tall. In its original habitat in Japan it can even reach 12 m. When the tree is bare, the olive-green twigs are visible and show striking, white-grey longitudinal stripes. The green, 3-lobed, leaf varies in size from 7 to 15 cm. Across it is circa 10 cm. In autumn it turns from flaming orange-red to scarlet-red. This is a very important decorative feature. The tree forms a shallow root system which branches out profusely. A much applied maple from the group of striated maples. Though the plant prefers a warm position, scorching may occur in hot summers.
