

Acer saccharinum 'Pyramidale'

Výška	20 m, fast growing
Šírka	8-12m
Koruna	initially columnar, later oval to round, dark, dense crown
Kôra a vetvy	grey and smooth
Listy	palmate, 5 lobes, dark green, 10 - 15 cm, autumn colour yellow
Jesenné sfarbenie	Žltá
Kvety	green-yellow, inconspicuous, March
Plody	winged nutlets, 4 - 5 cm long
Trne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	both wet and dry soil, tolerates paved surfaces
Pôdna vlhkosť	Odolné voči krátkodobému zaplaveniu, Odolné voči dlhodobému zaplaveniu
Spevnené plochy	Toleruje čiastočné spevnenie
Zóna odolnosti	4 (-34,4 do -28,9 °C)
Odolnosť voči vetru	moderate
Ostatná odolnosť	Odolné mrazu (WH 1-6)
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1-6), Cenné pre včely (medonosné)
Použitie	bulváre a široké ulice, priemyselné oblasti
Tvar	Vysokokmeň, Viackmeň
Pôvod	Baumschule L. Späth, Berlin, Germany, 1885
Synonymum	Acer saccharinum var. fastigiatum

Large tree with a wide columnar habit in its juvenile years. Maturing oval to round. The base of the crown is formed by a few heavy, upright branches. Height circa 20 m., spread circa 12 m. The 5-lobed leaf is dark green with a grey-white underside. In spring unfurling in blue-red hues. The shape of the leaf is regular and very deeply lobed. Autumn colour is yellow. The green-yellow flower bundles emerge before the leaves unfurl. Shallow root system with strongly branching roots and fibrous rootlets. May push up hard surfaces. Tolerant to moist soils. 'Pyramidale' suffers less from breaking branches than of the species. Winter hardiness zone: 4
