

Acer saccharum 'Green Mountain'

Výška	15 m
Šírka	10-14m
Koruna	broad pyramidal to broad ovoid, dark, dense crown
Kôra a vetvy	grey bark, greenish brown branches
Listy	3/5 lobes, dark green, thick, 8 - 15 cm, autumn colour yellow to red
Jesenné sfarbenie	Žltá, Červená
Kvety	green-yellow, inconspicuous, March
Plody	winged nutlets, 4 - 5 cm long
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	hardly any soil requirements, not too wet
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	4 (-34,4 do -28,9 °C)
Odolnosť voči vetru	moderate to poor
Ostatná odolnosť	Odolné mrazu (WH 1–6)
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Cenné pre včely (medonosné)
Použitie	bulváre a široké ulice
Tvar	Vysokokmeň
Pôvod	Princeton Nurseries, Kingston, NJ, USA, 1964

American cultivar with a dense, wide pyramidal to wide egg-shaped crown. Height circa 15 m, rarely spreading over 10 m. Vigorously growing. The leathery, dark green leaf has a striking, yellow to red autumn colour. This belongs to the best within A. saccharum assortment. Habit and leaf shape resemble A. platanoides, the difference being that the bruised leaf of A. saccharum does not produce milky sap but a clear liquid. The pendent, yellow-green panicles appear simultaneously with the unfurling leaves. The root system is shallow with many branching roots. A soil that is too wet is unsuitable. Can be applied in parks, wide avenues and streets. Sensitive to salt for icy roads. Intolerant to hard surfaces. Winter hardiness zone: 4
