

Aesculus pavia var. discolor

Výška	circa 10 m
Šírka	6-8m
Koruna	globular, dark, dense crown
Kôra a vetvy	brown, twigs sometimes with short hairs
Listy	5 leaflets, topside dark green, underside grey, circa 15 cm
Kvety	slender upright panicles, yellow red, June
Plody	smooth, light brown, irregular crop
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	few requirements
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	6b (-20,5 do -17,8 °C)
Odolnosť voči vetru	bad
Ostatná odolnosť	Odolné mrazu (WH 1-6)
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1-6), Cenné pre včely (medonosné)
Tvar	Vysokokmeň
Pôvod	south-eastern of North America

This variety reaches a little bit higher than the species, but remains clearly smaller than the A. pavia 'Atrosanguinea'. Forms a tall shrub to average-sized tree with a round, thick crown. The lightly haired twigs have buds that are non-sticky. The underside of the short-stalked leaves is conspicuously grey-velvety haired. The topside is mat shiny and dark green. They reach up to 15 cm across and they have 5 leaflets, palmatifid-compound. The leaves are shed early in autumn. The yellow red flowers appear in upright panicles up to 20 cm in length. The tree thrives best in slightly moist soil. Good hardiness but susceptible to salt (for icy roads). Intolerant to hard surfaces.
