

Amelanchier rotundifolia

'Edelweiss'

Výška	2-3 m
Šírka	2-3m
Koruna	broad ovoid, light, open crown
Kôra a vetvy	grey
Listy	green, silvergrey
Jesenné sfarbenie	Žltá, Oranžová, Červená
Kvety	cream-white, flowers in April
Plody	edible fruits, blue, black
Tŕne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	loamy soil, sandy soil, peaty soil, acid soil, calcareous soil
Spevnené plochy	Toleruje čiastočné spevnenie
Zóna odolnosti	5a (-28,8 do -26,1 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné mrazu (WH 1-6), Odolné vetru
Použitie	stromy do nádob, strešné záhrady, malé záhrady, dvory
Tvar	Vysokokemeň, Viackmeň

Grows naturally as a shrub, but frequently grafted onto a stem in practice. The loose branching pattern produces an open crown. On emerging, the leaf has white, felt-like hairs on the underside, giving it a silver-grey appearance. These hairs disappear in the summer and the oval leaves are conspicuously grey-green. The autumn colours vary each year, but are usually a combination of yellow, orange and red hues. The creamy white flowers are strikingly large and grouped in dense racemes. The edible fruits are fairly small and blue-black. Amelanchier has few soil requirements but grows best in calcareous soil.
