

Betula pendula FASTIGIATA JOES

('Jolep1')

Výška	15-20 m
Šírka	3-4m
Koruna	columnar, half-open crown
Kôra a vetvy	flaking, white
Listy	green
Jesenné sfarbenie	Žltá, Oranžová
Kvety	yellowgreen, flowers in April
Plody	brown
Tŕne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	clay soil, loamy soil, sandy soil, peaty soil, nutrient-poor soil, acid soil
Spevnené plochy	Toleruje čiastočné spevnenie
Zóna odolnosti	2 (-45,5 do -40,1 °C)
Odolnosť voči vetru	moderate to good, no sea wind
Ostatná odolnosť	Odolné mrazu (WH 1-6)
Použitie	úzke ulice, malé záhrady
Tvar	Vetvený

FASTIGIATA JOES is a columnar birch with a tighter crown shape than 'Fastigiata'. The upright twigs are straighter, thicker and therefore sturdier than in 'Fastigiata', giving the tree a more robust appearance. The crown is quite dense (for a birch) and the twig tops do not hang down as much as in 'Fastigiata'. Already within a few years, the striking grey-white trunk is visible. This forms a good combination with the dark green foliage of FASTIGIATA JOES.

Handsome cultivar that is widely applicable in parks, gardens, streets and avenues. Because of its shape, it is also very suitable for narrow profiles, in shopping centres and residential areas. FASTIGIATA JOES was found by John de Lepper, Hulsel, the Netherlands and introduced in 2014. Hardiness zone 2
