

Betula pendula 'Zwitsers Glorie'

Výška	10 - 15 m, fast growing
Šírka	4-8m
Koruna	narrow pyramidal, half-open crown
Kôra a vetvy	white to grey-white, peeling somewhat, later grooved at the base
Listy	ovate to diamond-shaped, glossy fresh green
Jesenné sfarbenie	Žltá
Kvety	Yellow-green catkins, ? about 1 cm and erect, ? 3 - 8 cm, April
Plody	yellowish-brown fruiting catkins, pendent
Trúne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	few requirements, tolerates drought
Pôdna vlhkosť	Vhodné do suchých pôd
Spevnené plochy	Toleruje čiastočné spevnenie
Zóna odolnosti	2 (-45,5 do -40,1 °C)
Odolnosť voči vetru	very good, no sea wind
Ostatná odolnosť	Odolné mrazu (WH 1-6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1-6), Odolné vetru, Cenné pre motýle
Použitie	bulváre a široké ulice, stromy do nádob, strešné záhrady
Tvar	Vysokokmeň, Vetvený, Viackmeň
Pôvod	Boomkwekerij J. van Roessel, Moergestel, Netherlands, 1994

Medium-size tree with healthy, vigorous growth; has a slender, narrowly pyramidal crown. First year twigs dark brown, older bark white to grey-white. The bark is only slightly peeling; only older trees acquire a grooved trunk base. Forms a nicely vertical main stem with the branches growing from the central leader at an angle of about 45°. The glossy, fresh green leaf turns golden yellow in autumn. Due to the narrowly pyramidal crown, good anchoring and fairly light side branches, the tree is highly suitable for avenues and streets. Also very useful in landscape planting. Was discovered in Switzerland by Sjeff van Roessel and introduced after extensive testing.
