

Cercidiphyllum japonicum

Výška	6 - 12 (15) m
Šírka	6-9m
Koruna	at first ovate, later round, dark, dense crown, capricious growing
Kôra a vetvy	grey, grooved, when maturing peeling in fleshy flakes
Listy	ovate to almost round, mat green, 5 - 10 cm
Jesenné sfarbenie	Žltá, Oranžová
Kvety	monoecious, inconspicuous, reddish, April, fragrant flowers
Plody	follicles, circa 1.5 cm long, purple brown
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	loose, preferably loamy, not too dry
Pôdna vlhkosť	Odolné voči krátkodobému zaplaveniu
Spevnené plochy	Toleruje čiastočné spevnenie
Zóna odolnosti	5a (-28,8 do -26,1 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Použitie	bulváre a široké ulice
Tvar	Vysokokmeň, Vetvený, Viackmeň
Pôvod	Japan, China

Often a multiple-stemmed tree with an ovate, later wider and eventually round crown when mature. It is densely branched and has many thin twigs at the ends. The trunk is smooth at first, but when maturing it gets deep grooves and peeling vertical bark strips. The leaf of “Cercidiphyllum” sprouts early and therefore it is susceptible to night frost, any frost damage recovers rapidly. The leaf is ovate to almost round, sometimes wide heart-shaped. The young leaf has a bronze colour, in summer it is bluish-green, the underside, too, is blue green. In autumn the entire tree turns yellow orange to orange red and is a real eye-catcher in every garden. The tree is shallow rooting with a delicate system. The shedding leaf smells distinctly of freshly baked biscuits or bread, hence its German name.
