

Cornus mas 'Aurea'

Výška	5 - 6 m
Šírka	5-6m
Koruna	wide ovoid to round, dark, dense crown, capricious growing
Kôra a vetvy	grey-brown, slightly peeling, young twigs red-green
Listy	oval to ovate, yellow, 5 - 10 cm
Jesenné sfarbenie	Žltá, Oranžová
Kvety	in small umbels, light yellow, February/March
Plody	glossy red berry-like stone-fruit, edible, edible fruits
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	preferably calcareous
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	5a (-28,8 do -26,1 °C)
Odolnosť voči vetru	very good
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Plody ako potrava pre vtáctvo
Použitie	stromy do nádob, strešné záhrady, malé záhrady, dvory
Tvar	Vysokokmeň, Vetvený, Viackmeň
Pôvod	unknown

Yellow-leaved cultivar of the yellow dogwood. Grows into a multi-stemmed, small tree with a dense, almost round crown. Slow grower. Becomes as wide as it is high. The leaf is golden yellow and also in summer it clearly has a yellow colour. In autumn it is yellow to orange red. It flowers strikingly in winter, well before the leaves appear. The plant is covered completely then by yellow flowers which appear in small, domed umbels. In the early autumn they are followed by oval, glossy red berry-like stone-fruits that are circa 2 cm across. They hang down from short stalks and are edible, but taste slightly acid. Useful for marmelade, juice and wine-making. This cultivar usually bears many fruits, which contrast magnificently with the yellow leaf. Root growth is densely branched and shallow. Prefers calcareous soils.
