

Euonymus hamiltonianus 'Indian Summer'

Výška	2-3 m
Šírka	2-3m
Koruna	round/spherical, dark, dense crown
Kôra a vetvy	brown
Listy	green
Jesenné sfarbenie	Červená
Kvety	greenyellow, flowers in May
Plody	orange, red, roze
Třne	Žiadny
Jedovatost	Má jedovaté časti
Typ pôdy	clay soil, loamy soil, sandy soil, calcareous soil
Pôdna vlhkosť	Vhodné do suchých pôd
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	5 (-28,8 do -23,4 °C)
Ostatná odolnosť	Odolné mrazu (WH 1-6)
Použitie	stromy do nádob, strešné záhrady, priemyselné oblasti, malé záhrady, dvory
Tvar	Vysokokmeň

'Indian Summer' grows into a substantial shrub or small tree with a broad ovoid to round crown of 3-5 m in height, higher (10 m) under favourable growing conditions. It is a healthy, well-growing cultivar whose young twigs are light brownish-red and the old bark grey-brown and grooved. The oval-lanceolate leaves are mid-green and turn a beautiful deep red in autumn. This autumn colouring starts around mid-October and can last for almost two months. The green flowering is inconspicuous, but the dark pink fruits containing orange seeds are striking. Suitable for application to well-drained soils. Tolerates calcareous soil and tolerates drought. Slightly erratic growing small tree, suitable for use in gardens, parks and cemeteries.
