

Fagus orientalis 'Iskander'

Výška	15-20 m
Šírka	2-4m
Koruna	columnar, dark, dense crown
Kôra a vetvy	grey
Listy	green
Jesenné sfarbenie	Žltá
Kvety	yellowgreen, flowers in May
Plody	brown
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	loamy soil, sandy soil, peaty soil
Pôdna vlhkosť	Vhodné do suchých pôd
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	6a (-23,3 do -20,6 °C)
Odolnosť voči vetru	fairly to moderate
Ostatná odolnosť	Odolné mrazu (WH 1–6)
Použitie	bulváre a široké ulice, úzke ulice
Tvar	Vysokokmeň, Vetvený

Slender, columnar tree with a vertical branch pattern and equally erect twigs. The branch structure is sturdier than with *F. sylvatica* and cultivars. Very predictable in shape and can attain a height of over 20 m, with a width of only a few metres. The oval to obovate leaf is 6 - 12 cm in size and glossy dark green. It remains glossy and healthy even in the second half of summer. Blossom is inconspicuous; the tree will only start to bear more fruit when mature. Prefers well-drained, humic soil that is not too wet. Thrives better in warm, dryer conditions than *F. sylvatica* cultivars.
