

## Fagus sylvatica 'Aspleniifolia'

Výška	10 - 15 m
Šírka	10-15m
Koruna	round, dark, dense crown
Kôra a vetvy	smooth, grey bark, soft
Listy	oval, deeply lobed to deeply dissected, dark green, about 10 cm long
Jesenné sfarbenie	Žltá
Kvety	small, inconspicuous flower catkins, May
Plody	nuts, in cupules covered with brushy spines, 1 - 2 cm
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	well drained, humic soil, not too wet
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	5b (-26,0 do -23,4 °C)
Odolnosť voči vetru	moderate
Ostatná odolnosť	Odolné mrazu (WH 1–6)
Použitie	bulváre a široké ulice
Tvar	Vysokokmeň, Vetvený, Viackmeň
Pôvod	France, circa 1804

A cultivar that draws the attention because of its decorative, deeply dissected leaf. It attains a height of 10 - 15 m. When maturing it gets a dense, spreading crown. The smooth bark is grey. The dark-green leaves are irregularly deeply dissected to lobed. Some leaves are very narrow and have a few small side-lobes, they become ± 10 cm long and ± 5 cm wide. The autumn colour is warm golden yellow and the inflorescence is inconspicuous. In autumn the 1 - 2 cm long nuts follow, it bears profusely only at a later age. 'Aspleniifolia' is a solitary and prefers not too wet soil, well-drained and high in humus content. Moderately wind resistant. Winter hardiness zone: 5b
