

## Fraxinus angustifolia 'Raywood'

|                            |  |
|----------------------------|--|
| <b>Výška</b>               | 15 - 20 m  |
| <b>Šírka</b>               | 8-12m  |
| <b>Koruna</b>              | wide ovoid to round, half-open crown                                 |
| <b>Kôra a vetvy</b>        | at a mature age deeply furrowed                                      |
| <b>Listy</b>               | odd-pinnate, 9 - 13 leaflets, deep green, 15 - 25 cm, feathered leaf |
| <b>Jesenné sfarbenie</b>   | Oranžová, Červená, Fialová   |
| <b>Kvety</b>               | inconspicuous yellow green, in small panicles, April                 |
| <b>Plody</b>               | none, fruitless cultivar   |
| <b>Tríne</b>               | Žiadny   |
| <b>Jedovatosť</b>          | Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá                  |
| <b>Typ pôdy</b>            | not too rich in connection with growth rate                          |
| <b>Pôdna vlhkosť</b>       | Vhodné do suchých pôd, Vhodné do vlhkých pôd                         |
| <b>Spevnené plochy</b>     | Toleruje spevnenie   |
| <b>Zóna odolnosti</b>      | 6a (-23,3 do -20,6 °C)   |
| <b>Odolnosť voči vetru</b> | poor in the case of a rapid growth                                   |
| <b>Ostatná odolnosť</b>    | Odolné mrazu (WH 1–6), Odolné posypovej soli                         |
| <b>Použitie</b>            | bulváre a široké ulice   |
| <b>Tvar</b>                | Vysokokmeň, Viackmeň   |
| <b>Pôvod</b>               | Australia, 1920  |
| <b>Synonymum</b>           | Fraxinus a. 'Flame', Fraxinus a. wollastonii                         |

Healthy, but not strongly growing selection with a slightly irregular crown. *F. angustifolia* 'Flame' and 'Wollastonii' are identical to 'Raywood' and can be considered to be synonyms. The main branch grows straight and the structural branches grow diagonally upwards. The bark is grey and at a mature age deeply furrowed, twigs turn from olive green to grey green. 'Raywood' has a closed crown when young, mature trees become half open. The shiny, deep-green leaf consists of 9 - 13 narrow leaflets. These are circa 5 - 10 cm long. In autumn the leaf turns aurantiaceous to deep purple red. In warmer soils and in a hot autumn the autumn colour is much more intense. After the inconspicuous bloom there are no fruits. In fertile soils the growth is often more rapid than in poor soils. Breakage of the branches can be the consequence.
