

Fraxinus excelsior 'Maxima'

Výška	15-20 m
Šírka	10-15m
Koruna	oval, dark, dense crown
Kôra a vetvy	brown, grey
Listy	green, feathered leaf
Kvety	yellow, flowers in April
Plody	brown
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	clay soil, loamy soil, sandy soil, calcareous soil
Pôdna vlhkosť	Vhodné do vlhkých pôd
Spevnené plochy	Toleruje čiastočné spevnenie
Zóna odolnosti	4 (-34,4 do -28,9 °C)
Odolnosť voči vetru	very good
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru, Odolné posypovej soli
Použitie	bulváre a široké ulice, pobrežné zóny, priemyselné oblasti

Moderately fast growing tree with a straight central leader and broad oval crown. The tree branches well when young, producing a dense crown at an early stage. Mature trees are conspicuous for their regularly formed crown, which is clearly more regular than typical for the species. The leaves are fresh, dark green. The tree was selected (partly) for its significantly lower susceptibility to red spider mite. This means the leaf stays fresh green until autumn. Good street, avenue and park tree. Also highly suitable for use in open spaces. Prefers fertile, fairly moist soil; cannot tolerate paved surfaces. Tolerates a lot of wind.
