

Fraxinus ornus OBELISK ('Paus Johannes Paulus II')

Výška	8 - 10 (15) m
Šírka	4-5m
Koruna	narrow columnar, later more spreading , half-open crown
Kôra a vetvy	smooth, grey bark
Listy	odd-pinnate, 7 - 9 leaflets, dull green, circa 20 - 25 cm , feathered leaf
Kvety	white, in tall erect terminal panicles, May/June, , fragrant flowers
Plody	winged fruit (keys)
Tŕne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	tolerates drier, calcareous soils
Pôdna vlhkosť	Vhodné do suchých pôd
Spevnené plochy	Toleruje spevnenie
Zóna odolnosti	7a (-17,7 do -15,0 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné vetru, Odolné posypovej soli
Použitie	bulváre a široké ulice, úzke ulice, stromy do nádob, strešné záhrady, pobrežné zóny, priemyselné oblasti
Tvar	Vysokokmeň
Pôvod	Nursery 'Bonte Hoek', Glimmen (NL)

A recent selection that has a columnar shape when juvenile. The main branch grows bolt upright. Later the crown spreads a little. Mature trees have a brown-grey bark which is remarkably smooth and the branches turn from olive green to dull-grey. They have many small lenticels. The large leaf consists of (5) 7 - 9 oblong leaflets that are 5 - 10 cm long. When still young this ash does not flower profusely, however, older trees flower abundantly. 'Obelisk' is one of the most beautiful flowering ashes. The panicles appear after the leaf and they are 10 - 12 cm long and wide. The numerous fruit clusters are ornamental and persist well into winter. The tree is used as street and avenue tree and tolerates hard surfaces well. Prefers drier, calcareous soil.
