

Hamamelis xintermedia 'Angelly'

Výška	4-5 m
Šírka	4-5m
Koruna	vase-shaped, dark, dense crown, capricious growing
Kôra a vetvy	brown
Listy	green
Jesenné sfarbenie	Žltá, Červená
Kvety	bright yellow, flowers in February
Plody	brown
Trne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	loamy soil, sandy soil, peaty soil, acid soil
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	6b (-20,5 do -17,8 °C)
Odolnosť voči vetru	moderate
Ostatná odolnosť	Odolné mrazu (WH 1–6)
Použitie	stromy do nádob, malé záhrady, dvory
Tvar	Vysokokmeň, Viackmeň

Relatively slow growing, fairly sturdy shrub, very occasionally a small tree. Has a regular, vase-shaped form, reinforced by its compact growth and dense branching pattern. The flowers are an intense bright yellow and, with a diameter of almost 4.5 cm, are among the biggest in the Hamamelis genus. They have hardly any fragrance, but this is more than compensated by the profuse blossoming. Flowers fairly late in the season, usually around mid-February/early March. Was named in 1985 by J.H.M. van Heijningen of Breda, the Netherlands, after his daughters Angeline and Elly.
