

Ilex x koehneana 'Chestnut Leaf'

Výška	6 - 12 (15) m
Šírka	3-6m
Koruna	pyramidal, dark, dense crown
Kôra a vetvy	twigs bright green, bark green-brown, smooth
Listy	oval to elliptical, glossy dark green, regularly spiked margin, 11 - 16 cm, evergreen
Kvety	unisexual, white, in clusters in the leaf axils, May/June
Plody	fleshy, round drupe, orange-red
Tríne	Žiadny
Jedovatosť	Má jedovaté časti
Typ pôdy	humic, well-drained soil, tolerates either acidic or calcareous soil
Pôdna vlhkosť	Vhodné do suchých pôd
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	6 (-23,3 do -17,8 °C)
Odolnosť voči vetru	very good
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Plody ako potrava pre vtáctvo
Použitie	stromy do nádob, strešné záhrady, pobrežné zóny, malé záhrady, dvory
Tvar	Vysokokmeň
Pôvod	France
Synonymum	Ilex castaneifolia

Medium-size to large tree with a regular, pyramidal crown. Young twigs are bright green, mature bark is green-brown and smooth. The glossy dark green leaves are fairly thick and feel very leathery. The margins are only slightly undulate, with regular spikes. The spikes are fairly short and feel slightly sharp. The flowers are small, fairly inconspicuous and female. They are followed by orange-red, fleshy drupes (commonly called berries). Originated from a cross between *I. aquifolium* and *I. latifolia*. Prefers a humic, moist but well-drained soil and tolerates either acidic or calcareous soil. Can tolerate hot, dry conditions. Also suitable for use in wide avenues.
