

Juglans regia 'Franquette'

Výška	20-30 m
Šírka	15-20m
Koruna	round/spherical, half-open crown
Kôra a vetvy	grey
Listy	green, feathered leaf
Kvety	yellowgreen, flowers in May
Plody	edible fruits, brown
Tŕne	žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	clay soil, loamy soil, sandy soil, calcareous soil
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	5b (-26,0 do -23,4 °C)
Odobnosť voči vetru	good
Ostatná odolnosť	Odolné mrazu (WH 1-6), Odolné vetru
Použitie	bulváre a široké ulice
Tvar	Vysokokmeň

Juglans regia 'Franquette' is a vigorous and strong grower with an ascending, oval-round, open crown and a height of 20 - 30 m. The trunk, branches and leaves are identical to those of the species. After the emergence of the leaves the male and female flowers appear. They appear roughly simultaneously so that pollination is possible. But for effective pollination it is recommended that another type be planted close by, for example J. 'Buccaneer'. 'Franquette' bears fruit at an early age. Winter hardiness zone: 5b
