

Liquidambar formosana

Výška	20-25 m
Šírka	10-15m
Koruna	broad vase-shaped, dark, dense crown
Kôra a vetvy	grey
Listy	green
Jesenné sfarbenie	Žltá, Oranžová, Červená
Kvety	yellowgreen, flowers in April
Plody	brown
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	clay soil, loamy soil, sandy soil, peaty soil
Pôdna vlhkosť	Vhodné do vlhkých pôd
Spevnené plochy	Toleruje spevnenie
Zóna odolnosti	7b (-14,9 do -12,3 °C)
Odolnosť voči vetru	moderate
Tvar	Vysokokmeň

Large, strongly branching tree with a sturdy, vertical, smooth trunk. Normally up to 20-25 m high, in some cases even up to 40 m. The crown is wide vase-shaped. The palmately lobed leaf has 3 to 5 lobes and the leaf underside is hairy. Inconspicuous flowers in April. The spiky brown capsules hang from long stems of about 3 cm. The dark green leaf turns dark red to deep purple in autumn. This Liquidambar has no corky fissures. Suitable for parks. Prefers moist soil, but should be planted in a sheltered location due to sensitivity to frost and wind.
