

Maackia amurensis

Výška	8 - 12 m
Šírka	8-12m
Koruna	round to wide umbel-shaped, half-open crown, capricious growing
Kôra a vetvy	slightly peeling, brown bark
Listy	odd-pinnate, 7 - 11 leaflets, bright green, 20 - 30 cm, feathered leaf
Kvety	erect racemes, (yellow) white, July/August
Plody	flat pod, 3 - 6 cm long
Trne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	high in humus content and well-drained
Pôdna vlhkosť	Vhodné do suchých pôd
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	5a (-28,8 do -26,1 °C)
Odolnosť voči vetru	moderate
Ostatná odolnosť	Odolné mrazu (WH 1–6)
Použitie	stromy do nádob, strešné záhrady
Tvar	Vysokokmeň, Viackmeň
Pôvod	Manchuria, Korea and Japan

An uncommon tree with an open, round crown, becoming wide umbel-shaped later. Native to East Asia. The tree has been grown in Europe for some time and is appreciated because of its decorative foliage and flower. The mature bark is slightly peeling. The large leaf consists of 7 to 11 ovate leaflets, each 5 - 8 cm long. When unfolding the leaf is strikingly silver-grey haired. The underside remains hairy. The white flowers, each almost 1 cm, are arranged in erect racemes that are 10 - 15 cm long. The flat pods that can reach 3 - 6 cm, appear in autumn. In spite of the reliable hardiness, the Maackia amurensis prefers a sheltered site.
