

Malus 'Red Sentinel'

Výška	5 - 6 m
Šírka	4-5m
Koruna	round, half-open crown
Kôra a vetvy	hairless, dark brown
Listy	ovoid, green, emerge bronze coloured, 6 - 8 cm
Kvety	pure white, Ø 4 - 4.5 cm, pale purple when in bud, May
Plody	purplish-red, remain on tree until January, Ø up to 2.8 cm
Trne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	nutritious, well drained soil
Spevnené plochy	Toleruje čiastočné spevnenie
Zóna odolnosti	3 (-40,0 do -24,5 °C)
Odolnosť voči vetru	good, susceptible to sea wind
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Plody ako potrava pre vtáctvo
Použitie	stromy do nádob, strešné záhrady, priemyselné oblasti, malé záhrady, dvory
Tvar	Vysokokmeň, Viackmeň
Pôvod	New Zealand, before 1959

Small tree with a rounded crown. The branches grow outwards, later becoming somewhat pendulous. The twigs and bark are hairless and dark brown. The green leaves emerge bronze coloured and have red-tinted stems. The flowers, approx. 4 cm in size, grow in bundles of 4 to 8 together and are single. In the bud the flowers are pink but they turn white when open. 'Red Sentinel' produces numerous, spherical, bright red fruits with a diameter of approx. 2.8 cm; they remain on the tree for a long time. Can be used in parks, public gardens and gardens. Can be used as a street tree only in stretches of greenery. Stands up well to understorey. Allowing a solitary planted shrub to grow into a multi-trunked tree can produce an attractive effect. 'Red Sentinel' requires a nutritious, not too dry soil and is somewhat sensitive to scab.
