

Malus robusta 'Persicifolia'

Výška	6-8 m
Šírka	4-5m
Koruna	broad vase-shaped, half-open crown
Kôra a vetvy	brown, grey
Listy	green
Kvety	pink, red, flowers in May, fragrant flowers
Plody	red, purple/brown
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	clay soil, loamy soil, sandy soil, acid soil
Spevnené plochy	Toleruje spevnenie
Zóna odolnosti	5 (-28,8 do -23,4 °C)
Odolnosť voči vetru	good, susceptible to sea wind
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Plody ako potrava pre vtáctvo
Použitie	priemyselné oblasti, malé záhrady, dvory
Tvar	Vysokokmeň, Viackmeň

'Persicifolia' grows from a shrub form into a, usually multi-stemmed, small tree with a height of about 5 m. The crown is oval to broadly oval and semi-open. The leaves are narrow, 7-8 cm long and look somewhat like the leaves of a peach tree. In April, 'Persicifolia' flowers very profusely with single white flowers about 4 cm in size. The flower buds are pale pink, contrasting well with the flowers. Flowering is followed by fairly small (about 2 cm) ornamental apples. These are shiny red and very eye-catching and remain on the tree until February. Both the flowering and the fruits are striking, giving 'Persicifolia' double ornamental value.

Malus ×robusta 'Persicifolia' is a healthy ornamental apple. The tree is virtually soil tolerant, provided it is sufficiently permeable and sufficiently nutritious. Tolerates wind, but not sea wind. Can also be used in paving.

Malus ×robusta 'Persicifolia' is a natural hybrid, whose seed was collected by English planthunter William Purdom near Beijing. The tree was introduced by J. Veitch & Sons in 1910. Hardiness zone 5.
