

Parrotia persica 'Pendula'

Výška	3 m
Šírka	2-3m
Koruna	broad, weeping, dark, dense crown, capricious growing
Kôra a vetvy	twigs olive brown, bark light grey with purple patches, peels off in thin plates
Listy	oval to obovate, green, 7 - 10 cm
Jesenné sfarbenie	Žltá, Oranžová
Kvety	small flower heads, red, February/March
Plody	spiked capsule, approx. 1 cm
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	moisture retentive
Pôdna vlhkosť	Vhodné do suchých pôd
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	5a (-28,8 do -26,1 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Použitie	stromy do nádob, strešné záhrady, malé záhrady, dvory
Pôvod	Royal Botanic Gardens, Kew, London, England, 1934

Small weeping shape that does not naturally make an ascending trunk but grows with many widely drooping lateral branches. Height approx. 1.5 m and significantly wider. After many years it can attain height of 3 m. In culture, 'Pendula' is usually grafted onto a stem from which the branches cascade like a waterfall. The tree will then become taller. The green leaf turns light yellow to somewhat orange in autumn. The blossom is the same as the species but 'Pendula' hardly blossoms. It therefore bears little fruit. Unusual tree that deserves a conspicuous site as park or garden.
