

Prunus maackii

Výška	8-12 m
Šírka	6-8m
Koruna	broad ovoid, half-open crown
Kôra a vetvy	flaking, yellowbrown, gold colour, orange
Listy	green
Jesenné sfarbenie	Žltá, Červená
Kvety	white, flowers in April, fragrant flowers
Plody	black
Tréne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	clay soil, loamy soil, sandy soil, calcareous soil
Spevnené plochy	Toleruje čiastočné spevnenie
Zóna odolnosti	3 (-40,0 do -24,5 °C)
Odolnosť voči vetru	moderate
Ostatná odolnosť	Odolné mrazu (WH 1-6)
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1-6), Plody ako potrava pre vtáctvo
Použitie	bulváre a široké ulice, stromy do nádob, strešné záhrady
Tvar	Vysokokmeň, Viackmeň

Fast-growing, medium-sized, semi-transparent tree with ascending branches. It forms an ovoid crown with a final height of 8 - 12 m. A remarkable feature is the golden-yellow flaky bark and old branches. The leaves are approx. 10 cm long, oval to narrow oval, with a pointed top and a finely serrated edge. The small fragrant white flowers appear in standing bunches in late April and early May. The tree does not produce many flowers. The flowers are followed by small black fruits. *Prunus maackii* does well as a park tree and does not prosper in wet soil. This tree is not often cultivated. Winter hardiness zone: 3 The trunk and old branches of *Prunus maackii* turn a warm golden-brown colour. This makes the tree a worthwhile solitary even in the winter.
