

## Prunus padus 'Watereri'

|                                   |                                                      |
|-----------------------------------|------------------------------------------------------|
| <b>Výška</b>                      | 6-10 m                                               |
| <b>Šírka</b>                      | 5-9m                                                 |
| <b>Koruna</b>                     | round/spherical, half-open crown                     |
| <b>Kôra a vetvy</b>               | brown, black                                         |
| <b>Listy</b>                      | green                                                |
| <b>Kvety</b>                      | white, flowers in April, fragrant flowers            |
| <b>Plody</b>                      | black                                                |
| <b>Tríne</b>                      | Žiadny                                               |
| <b>Jedovatosť</b>                 | Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá  |
| <b>Typ pôdy</b>                   | clay soil, loamy soil, sandy soil, calcareous soil   |
| <b>Spevnené plochy</b>            | Toleruje čiastočné spevnenie                         |
| <b>Zóna odolnosti</b>             | 3 (-40,0 do -24,5 °C)                                |
| <b>Odolnosť voči vetru</b>        | moderate                                             |
| <b>Ostatná odolnosť</b>           | Odolné mrazu (WH 1–6)                                |
| <b>Stromy pre zvieratá a hmyz</b> | Odolné mrazu (WH 1–6), Plody ako potrava pre vtáctvo |
| <b>Použitie</b>                   | bulváre a široké ulice                               |
| <b>Tvar</b>                       | Vysokokmeň, Viackmeň                                 |

Prunus padus 'Watereri' has a fairly open rounded crown. It grows somewhat faster than the species. Height 6 - 10 m. The dull brown to brownish-grey branches smell of bitter almonds when damaged. The dark green leaves are oval to obovate and have a finely serrated edge. Flowers in April and May, producing fragrant white flowers in pendulous bunches. The bunches are significantly longer than those of the species – approx. 20 cm. Black berries follow the flowers. Street, avenue and park tree. Winter hardiness zone: 3
