

Prunus 'The Bride'

Výška	5 - 8 m
Šírka	5-6m
Koruna	broad vase-shaped to flat-topped spherical, half-open crown
Kôra a vetvy	twigs grey, bark grey-brown
Listy	narrow ovate to elongated, tip long pointed , fresh green, 6 - 8 cm
Jesenné sfarbenie	Oranžová, Červená, Fialová
Kvety	white with pink stamens, early April
Plody	round, slightly oval, dark red, Ø approx. 1 cm
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	nutrient-rich, moist but well-drained soil
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	6a (-23,3 do -20,6 °C)
Odolnosť voči vetru	moderate
Ostatná odolnosť	Odolné mrazu (WH 1–6)
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Plody ako potrava pre vtáctvo
Použitie	stromy do nádob, malé záhrady
Tvar	Vysokokmeň, Viackmeň
Pôvod	Arboretum Kalmthout, Kalmthout, Belgium, ca. 1989

Small to medium-size tree, initially with quite narrow crown, but quickly broad vase-shaped. Later the branches overhang somewhat which may create a flat-topped, spherical crown. The leaf is narrow ovate to elongated and has a long pointed tip. It emerges as bronze-green and turns fresh green in summer. In autumn it displays various colours; orange, red and purple before falling. The flower buds are pink. Before the leaf emerges the tree blossoms very abundantly with large, single, white flowers with striking pink stamens. They may be followed by dark red, round to slightly oval fruits. ‘The Bride’ was found as a seedling of P. ‘Pandora’ by Harry van Trier. A good alternative to P. x yedoensis, which grows significantly larger. Does not tolerate permanently high water table.
