

Prunus virginiana 'Canada Red'

Výška	6 - 9 m
Šírka	3-6m
Koruna	narrow oval to oval, light, open crown
Kôra a vetvy	twigs brown-grey, bark grey-brown, smooth
Listy	broad elliptical, light green on emerging turning dark purplish red, 5 - 12 (15) cm
Kvety	white, about 1 cm, in protruding racemes, 7 - 15 cm, May
Plody	round, purplish red to purplish black, Ø about 8 cm
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	nutrient-rich, moist but well-drained soil
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	3 (-40,0 do -24,5 °C)
Odolnosť voči vetru	moderate
Ostatná odolnosť	Odolné mrazu (WH 1–6)
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Plody ako potrava pre vtáctvo
Použitie	bulváre a široké ulice, malé záhrady
Tvar	Vysokokmeň, Viackmeň
Pôvod	Bailey Nurseries, Newport, MN, USA, pre-1985

Easy and versatile medium-size tree with a narrow oval to oval, loose crown reaching heights of 6 to 9 m. The broad-elliptical leaf emerges light green but turns gradually darker during the season, eventually becoming dark purplish red at the end of summer. The leaf remains on the tree well into autumn and keeps its dark colour. Blossoms in May with small, white flowers in projecting racemes, followed by purplish red to purplish black fruits. Very much like 'Shubert' but with a more slender crown shape and grows somewhat more vigorously when young. This makes the tree better suited to use on open verges. Wide range of uses due to its excellent winter hardiness and easy growth. Preferably planted on a nutrient-rich, moist but well-drained soil.
