

Quercus palustris

TREEVOLUTION® 'Woodside Splendor'

Výška	20 - 25 m
Šírka	12-15m
Koruna	broad conical, later round, half-open crown
Kôra a vetvy	twigs olive green, bark grey, smooth to shallow grooved
Listy	ovate to oval, roughly lobed, glossy dark green, 7 - 15 cm
Jesenné sfarbenie	Červená
Kvety	golden coloured ? catkins, May
Plody	flat-topped spherical, approx. 1 cm
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	any, preferably fertile
Pôdna vlhkosť	Vhodné do vlhkých pôd
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	5a (-28,8 do -26,1 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru, Odolné posypovej soli
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Odolné posypovej soli, Plody ako potrava pre vtáctvo
Použitie	bulváre a široké ulice, priemyselné oblasti
Tvar	Vysokokmeň
Pôvod	Van den Berk Tree Nursery, Sint-Oedenrode, the Netherlands, 2015

A reasonably vigorously growing tree with a straight trunk and beautiful, horizontal branching pattern. The crown has a regular, broad conical shape, later round. The lower branches may sag somewhat after time. The young twigs are olive coloured. The older branches and bark are grey. The bark is smooth to shallow grooved. The leaf is 7 to 15 cm long, sometimes the same width and somewhat variable in shape. It is roughly lobed to around halfway along the leaf blade, with 2 to 4 sharply serrated lobes. It is glossy dark green, turning deep red every autumn. The tree holds on to its foliage in autumn longer than the species. Grows in almost any soil, tolerates air pollution and wet soil.
