

## Quercus shumardii

<b>Jesenné sfarbenie</b>	Žltá, Oranžová, Červená
<b>Tríne</b>	Žiadny
<b>Jedovatosť</b>	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
<b>Pôdna vlhkosť</b>	Vhodné do vlhkých pôd
<b>Spevnené plochy</b>	Netoleruje spevnené plochy
<b>Zóna odolnosti</b>	5 (-28,8 do -23,4 °C)
<b>Ostatná odolnosť</b>	Odolné mrazu (WH 1–6), Odolné posypovej soli
<b>Použitie</b>	parky, cintoríny, priemyselné oblasti, veľké záhrady
<b>Tvar</b>	Vysokokmeň, Viackmeň

An oak with an initially narrow to flaring vase-shaped crown that later becomes broad and open. Reaches a height of about 15 to 20 m but trees of 30 to 40 m in height occur in its natural range. The trunk is dull and grey-brown, deeply grooved and flaking in older age. The inverted ovoid to oval leaves are 7-lobed and deeply incised, sometimes to the mid-vein. It is dark green and the underside is hairy. In autumn, it turns yellow-bronze to light red. The acorns are ovoid and 1.5 - 3 cm long. They are enclosed only at the base by the saucer-shaped cup, which can be up to 3 cm in diameter. The nap is studded with thin adjacent scales. *Q. shumardii* also grows on wet soils and is often used landscaping.
