

## Salix viminalis

<b>Výška</b>	4-6 m, fast growing
<b>Šírka</b>	4-6m
<b>Koruna</b>	broad vase-shaped, half-open crown
<b>Kôra a vetvy</b>	grey
<b>Listy</b>	green, greygreen
<b>Jesenné sfarbenie</b>	Žltá
<b>Kvety</b>	golden-yellow , flowers in April
<b>Plody</b>	green
<b>Tríne</b>	Žiadny
<b>Jedovatosť</b>	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
<b>Typ pôdy</b>	clay soil, loamy soil, sandy soil
<b>Pôdna vlhkosť</b>	Vhodné do vlhkých pôd, Odolné voči krátkodobému zaplaveniu, Odolné voči dlhodobému zaplaveniu
<b>Spevnené plochy</b>	Toleruje čiastočné spevnenie
<b>Zóna odolnosti</b>	4 (-34,4 do -28,9 °C)
<b>Ostatná odolnosť</b>	Odolné mrazu (WH 1–6), Odolné vetru
<b>Stromy pre zvieratá a hmyz</b>	Odolné mrazu (WH 1–6), Odolné vetru, Cenné pre motýle
<b>Tvar</b>	Vysokokmeň, Viackmeň

Salix viminalis grows from a large shrub with often very long twigs, into a small tree to about 6 m in height, higher in exceptional cases. The densely branched crown is eventually round to fan-shaped. The bark remains smooth for a long time and will only become longitudinally grooved on old trees. The green to brownish-grey young twigs are fine and densely hairy. The fairly large leaves are remarkably narrow. On top, they are a glossy dark green and slightly hairy. The underside is shiny silver-grey and felt-like. In autumn, they often turn yellow before falling off.

The flower catkins appear in late winter and, with a greenish yellow to pale yellow colour, are not very conspicuous. The flowers open around February-March. The male flowers always have two stamens.

Salix viminalis grows naturally in moist to wet but nutrient-rich soil, on river banks and in pilot whales. However, S. viminalis will also grow in less wet locations, provided the soil is sufficiently nutrient-rich. The tree is suitable for landscape planting, in wadis and on banks.
