

Sorbus latifolia

Výška	12 - 15 m
Šírka	6-10m
Koruna	broad pyramidal, half-open crown
Kôra a vetvy	grey and smooth, young twigs reddish-brown with white hairs
Listy	ovoid, 4-lobed, glossy dark green, 6 - 12 cm
Kvety	white, in umbels up to 10 cm wide, May
Plody	(reddish-) brown to orange-yellow, Ø 1 - 1.5 cm, abundant
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	makes few demands, can grow on poor soils
Pôdna vlhkosť	Vhodné do suchých pôd
Spevnené plochy	Toleruje spevnenie
Zóna odolnosti	5a (-28,8 do -26,1 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Plody ako potrava pre vtáctvo
Použitie	bulváre a široké ulice, priemyselné oblasti
Tvar	Vysokokmeň, Viackmeň
Pôvod	Central Europe

Robust and fast growing tree with a broad, pyramidal, remarkably symmetrical crown. The trunk is grey and smooth and the young twigs are glossy reddish-brown and bear white hairs. Later they become bare. The broad ovoid to almost round and sturdy leathery leaves are glossy dark green. On the underside they are felt-like and yellowish-grey. The young emerging leaves also bear white felt-like hairs. The shallow-lobed leaf edge is serrated. In late May the umbels of creamy white flowers appear. In the late summer the (brownish-) red to orange-yellow berries emerge. *S. latifolia* bears an exceptionally abundant amount of fruit. The tree is very useful in industrial areas and stands up well to hard surfaces.
