

Sorbus torminalis

Výška	10 - 15 (20) m
Šírka	6-8m
Koruna	round, light, open crown
Kôra a vetvy	twigs grey-brown to reddish brown, bark grey to grey-brown, in peeling plates
Listy	broad ovate, pointed lobes, 6 - 11 cm, glossy green
Jesenné sfarbenie	Červená, Fialová
Kvety	white, Ø approx. 1.2 cm, in approx. 12 cm-wide corymbs, May
Plody	brown with lighter lenticels, oval, approx. 1.5 cm long
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	nutrient-rich and moist soils, tolerates some drought
Pôdna vlhkosť	Vhodné do suchých pôd
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	5b (-26,0 do -23,4 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Plody ako potrava pre vtáctvo
Tvar	Vysokokmeň, Viackmeň
Pôvod	Central and Southern Europe, North-West Africa and Asia Minor

Large tree with a round, open crown. Usually reaches 15 m tall but under very favourable conditions can grow to 20 m. The young twigs have contiguous hairs which it loses after the first winter. The old bark is shed, first in small rectangular plates, later in long, narrow strips. The leaves are glossy green and almost hairless on top. The underside is lighter and hairy. In autumn the leaf turns a lovely red to purplish red. The flowers open in May. They are white with striking yellow anthers and stand in wide corymbs. The oval fruits are brown with light brown lenticels that are visible as light dots. A strong tree that grows in all nutrient-rich and moist soils but also tolerates drier soils.
