

Syringa josikaea

Výška	4-5 m
Šírka	3-5m
Koruna	vase-shaped, dark, dense crown
Kôra a vetvy	grey
Listy	green
Kvety	violet, pink, flowers in May, fragrant flowers
Plody	fruitless cultivar
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	clay soil, loamy soil, sandy soil, peaty soil, acid soil
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	5 (-28,8 do -23,4 °C)
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Cenné pre včely (medonosné)
Použitie	stromy do nádob, strešné záhrady, malé záhrady
Tvar	Vysokokmeň, Vetvený

The Hungarian lilac is a large shrub that can only grow into a small tree under exceptionally good conditions. Its dense crown is round and grows to about 4 m high. The young twigs are reddish-brown and covered with few lenticels. The old bark is grey and smooth. The elliptical leaves are dark green on top and distinctly lighter blue-green to light greenish grey on the underside. In May and June, *S. josikaea* blooms with more or less erect panicles of violet flowers. The individual flowers are tubular and the lobes at the top do not spread, even when the flowers unfurl. They have a sweet but weak scent. In general, *S. josikaea* does not flower extremely profusely.

Because the ornamental value of *S. josikaea* is less than for the various cultivars of *S. vulgaris*, it is ideally a plant for use in park-like settings and public spaces. It is an easy plant that grows preferably in neutral or calcareous soil.
