

## Syringa vulgaris 'Charles Joly'

<b>Výška</b>	4-6 m
<b>Šírka</b>	2-3m
<b>Koruna</b>	vase-shaped, half-open crown
<b>Kôra a vetvy</b>	flaking, brown, grey
<b>Listy</b>	green
<b>Kvety</b>	light purplered, flowers in May, fragrant flowers
<b>Plody</b>	brown
<b>Tríne</b>	Žiadny
<b>Jedovatosť</b>	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
<b>Typ pôdy</b>	clay soil, loamy soil, sandy soil, peaty soil
<b>Spevnené plochy</b>	Netoleruje spevnené plochy
<b>Zóna odolnosti</b>	4 (-34,4 do -28,9 °C)
<b>Odolnosť voči vetru</b>	good
<b>Ostatná odolnosť</b>	Odolné mrazu (WH 1–6), Odolné vetru
<b>Stromy pre zvieratá a hmyz</b>	Odolné mrazu (WH 1–6), Odolné vetru, Cenné pre motýle
<b>Použitie</b>	stromy do nádob, strešné záhrady, malé záhrady
<b>Tvar</b>	Vysokokmeň, Viackmeň

'Charles Joly' is a large shrub to small tree with a broad oval crown of 3-4 m in height. The young twigs are slightly reddish-tinged. The old bark is grey-brown and flakes off slightly in small patches later in life. The broad ovoid leaves are mid-green in colour. The flower panicles are large and relatively narrow. They are about 12-22 cm long and 7-10 cm wide. The individual flowers, measuring about 1.6 cm, are relatively small. The flower buds are very dark purple. The opened flowers are dark purple and semi-filled. As the inner petals of the flowers are often raised and slightly twisted, the lighter purple underside is visible, creating a two-coloured effect. The flowers have a strong and pleasant fragrance. The flowers open in the second half of April and first week of May.

Syringa vulgaris grows in any nutritious and humus-rich soil. The plant prefers neutral to calcareous soil. 'Charles Joly' is very suitable for use in parks and gardens and was introduced in 1896 by Victor Lemoine & Fils in Nancy, France. Hardiness zone 4.
