

Syringa vulgaris 'Mme Lemoine'

Výška	4-6 m
Šírka	2-3m
Koruna	vase-shaped, half-open crown
Kôra a vetvy	flaking, brown, grey
Listy	green
Kvety	white, flowers in May, fragrant flowers
Plody	brown
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	clay soil, loamy soil, sandy soil, peaty soil
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	4 (-34,4 do -28,9 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Cenné pre motýle
Použitie	stromy do nádob, strešné záhrady, malé záhrady
Tvar	Vysokokmeň, Viackmeň

'Mme Lemoine' is a large shrub to small tree reaching 2-3 m in height. The young twigs are bright green and the old bark is grey-brown, flaking off slightly in small patches later in life. The broadly ovoid leaves are 9-12 cm long and are light green to mid-green in colour. The flower panicles are large and quite broad. They are about 15-22 cm long and 10-14 cm wide. The individual flowers, measuring about 1.7 cm, are quite large. The flower buds are pale greenish-yellow. The opened flowers are pure white and fully filled with narrow petals, giving the blooms a finer texture. They have a strong and pleasant fragrance. The flowers open in the first half of May. 'Mme Lemoine' flowers very richly, with up to four flower panicles per branch. This enhances the impression of a full, richly flowering plant.

Syringa vulgaris grows in any nutritious and humus-rich soil. The plant prefers neutral to calcareous soil. 'Mme Lemoine' is very suitable for use in parks and gardens. The cultivar was introduced in 1890 by Victor Lemoine & Fils in Nancy, France. Hardiness zone 4.
