

Tetradium daniellii

Výška	10 - 12 m, fast growing
Šírka	8-10m
Koruna	broad fan-shaped, half-open crown, capricious growing
Kôra a vetvy	grey, smooth bark, twigs olive green, velvety grey hair
Listy	imparipinnate, with 5 - 9 leaf segments, dark green, 20 - 35 cm, feathered leaf
Kvety	small white flowers in broad pyramidal plumes, June, fragrant flowers
Plody	reddish, Ø 0.8 - 1 cm.
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	well-permeable, rich in humus, not too wet
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	7a (-17,7 do -15,0 °C)
Odolnosť voči vetru	moderate
Stromy pre zvieratá a hmyz	Cenné pre motýle
Použitie	stromy do nádob
Tvar	Vysokokmeň, Viackmeň
Pôvod	Northern China, Korea
Synonymum	Euodia daniellii, Euodia velutina

Fast-growing solitary tree with a semi-open, broad, fan-shaped crown on a short trunk. The smooth bark is dark grey and has lenticels. Twigs are olive green, with velvety grey hair, and have small, whitish lenticels. They turn greyish brown the second year. The imparipinnate leaves consist of 5 - 9 opposed leaf segments and are 20 – 35 cm long. Each leaflet is ovoid and tapers to a point, 4 - 9 cm long with a short stem. The upper side of the leaf is dark green while the underside is light green. Aromatic white flowers, each 0.3 – 0.5 cm, grow in broad, pyramidal plumes of 10 – 15 cm. Reddish fruit appears after flowering. For a long time, this tree was known as Euodia, a synonym still commonly used.
