

Tilia cordata 'Savaria'

Výška	12 - 20 m
Šírka	7-10m
Koruna	pyramidal, later oval to ovoid, half-open crown
Kôra a vetvy	twigs green, later reddish brown, bark dark brown, grooved
Listy	more or less round with broad, heart-shaped base and pointed tip, dark green, 7 - 12 cm
Kvety	in corymbs, 5 - 9 together, yellow to cream-coloured, June/July, fragrant flowers
Plody	round to ovate, Ø 0.5 - 0.8 cm, first felt-like then bare
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	any, tolerates drought
Pôdna vlhkosť	Vhodné do suchých pôd
Spevnené plochy	Toleruje spevnenie
Zóna odolnosti	4 (-34,4 do -28,9 °C)
Odolnosť voči vetru	very good, also tolerates sea wind
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Cenné pre motýle
Použitie	bulváre a široké ulice, pobrežné zóny
Tvar	Vysokokmeň, Viackmeň
Pôvod	M. Józsa, Prenor Faiskola, Szombathely, Hungary, 2000

Healthy tree with a uniform crown to approx. 20 m tall and 10 m spread. Initially has a pyramidal crown with a continuous trunk and ascending branching. Later the crown spreads becoming oval to ovoid. The young twigs are green with reddish brown, mature bark is dark brown and grooved. The leaf is virtually round with a heart-shaped base and abruptly pointed tip. It is dark green and strikingly thick and robust. Fragrant flowers appear in early summer, growing in short corymbs. Fairly small fruits follow in late summer. First they are covered with grey felt-like hairs, later bare. Closely resembles 'Greenspire' but with thicker and firmer leaf. This makes 'Savaria' less susceptible to aphid and other infestations.
