

Tilia tomentosa 'Pendula'

Výška	20-30 m
Šírka	10-12m
Koruna	broad ovoid, half-open crown
Kôra a vetvy	grey
Listy	green, greygreen
Jesenné sfarbenie	Žltá
Kvety	yellow, flowers in July, fragrant flowers
Plody	green, grey
Trne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	clay soil, loamy soil, sandy soil, peaty soil
Pôdna vlhkosť	Vhodné do suchých pôd
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	6a (-23,3 do -20,6 °C)
Odolnosť voči vetru	tolerates (sea) wind
Ostatná odolnosť	Odolné mrazu (WH 1-6)
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1-6), Cenné pre motýle
Použitie	stromy do nádob, strešné záhrady, pobrežné zóny, priemyselné oblasti
Tvar	Vysokokmeň

A tree with an ascending manner of growth with hanging lateral branches, with particularly the young, limp twigs hanging down. Height 20 - 30 m, width approx. 12 m. Very suitable as a solitary tree in parks. Young twigs are greenish grey and have felt-like hair but are soon bare and green. The leaves are more or less round, darker green than those of the species and have a remarkably thick white felty underside. The leaf stem is often twice as long as that of the species, causing the leaves to move a great deal when the wind blows. They turn yellow and remain on the tree long into the autumn. In July, aromatic flowers appear. Fairly unsusceptible to aphids. Winter hardiness zone: 6a
