An American cultivar that grows more loosely and smaller than the species does. Height 12 - 15 m, width up to approx. 10 m. 'Wandell' has a good straight main branch on which upwards-slanting branches grow, thus forming a completely symmetrical crown. The smooth trunk is dark grey and the young twigs are greenish grey and felt-like. The leaves are more or less round, dark matt green with a remarkably thick white felt-like underside. The autumn colour is light yellow. In July, aromatic flowers appear. Its uniform manner of growth makes 'Wandell' very suitable for wide avenues, verges and parks. Fairly unsusceptible to aphids. Winter hardiness zone: 6a
