

Styphnolobium japonicum

PRINCETON UPRIGHT ('Fleright')

Výška	12 - 15 m
Šírka	6-8m
Koruna	oval to ovoid, half-open crown
Kôra a vetvy	grey
Listy	green, feathered leaf
Kvety	cream-white, flowers in July
Plody	grey
Tríne	Žiadny
Jedovatosť	Má jedovaté časti
Typ pôdy	clay soil, loamy soil, sandy soil, calcareous soil
Pôdna vlhkosť	Vhodné do suchých pôd
Spevnené plochy	Toleruje spevnenie
Zóna odolnosti	6a (-23,3 do -20,6 °C)
Odolnosť voči vetru	moderate
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné posypovej soli
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné posypovej soli, Cenné pre motýle
Použitie	bulváre a široké ulice, stromy do nádob, strešné záhrady, priemyselné oblasti
Synonymum	Sophora japonica PRINCETON UPRIGHT ('Fleright')

This upright growing American selection forms a compact oval to ovoid crown and grows 12 to 15 m high. The branches and twigs are strikingly green and have many light-coloured lenticels. When broken, they emit an unpleasant odour. The compound leaves are unevenly pinnate and about 25 cm long, the partial leaves are each 2 - 6 cm long and ovate to elliptical. They turn yellow in autumn. The creamy white to creamy yellow flowers are about 1.5 cm in size and stand in terminal panicles that grow to about 30 cm long. This cultivar flowers at a younger age than the species. Because of its abundant nectar, the tree is an excellent carrier plant. The grey pods are constricted between the seeds and appear in autumn. 'Fleright' suffers little from diseases and infestations. Sophora tolerates drought well.
