

Carpinus betulus TREEVOLUTION[®]

[®] THE SWING [®]

Šírka	3-4m
Jesenné sfarbenie	Žltá
Trne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Pôdna vlhkosť	Vhodné do suchých pôd, Vhodné do vlhkých pôd, Odolné voči krátkodobému zaplaveniu
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	5a (-28,8 do -26,1 °C)
Ostatná odolnosť	Odolné mrazu (WH 1-6), Odolné vetru
Použitie	stromy do nádob, priemyselné oblasti

THE SWING trees are roof form trees with a striking twist in the trunk. The idea for these trees arose from the need for a green roof above terraces, without the hindrance of a trunk in the middle. This is practical, but also better for the tree, because trees prefer not to stand in paving. Planted in a border, the roots can get more water and air and will not push up the paving. A win-win situation, and also a real eye-catcher in the garden. The effect of the S-shaped trunk gives every terrace or garden an elegant character. When SWING trees are planted opposite each other, it is possible to cover an entire terrace, but also a single well-placed tree can create a beautiful effect.

Just as with ordinary roof form trees, the roof needs to be pruned every year in order to retain its shape. **Platanus, Carpinus and Parrotia** THE SWING trees are grown in *Platanus x hispanica* (plane tree) and *Carpinus betulus* (hornbeam) as both are valued topiary trees and fit into many designs. Since autumn 2020, *Parrotia persica* (Persian ironwood), which colours so beautifully in autumn, has also been added to the range. THE SWING trees are patented and exclusively available from Van den Berk Nurseries.
