

Betula utilis 'Grayswood Ghost'

Šírka	6-10m
Jesenné sfarbenie	Žltá
Tŕne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Spevnené plochy	Toleruje čiastočné spevnenie
Zóna odolnosti	6 (-23,3 do -17,8 °C)
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Cenné pre motýle
Použitie	bulváre a široké ulice
Tvar	Vysokokmeň, Viackmeň

'Grayswood Ghost' is a medium to large type of tree often compared to the popular 'Thornwood', seen as its English equivalent. This tree develops a broad oval crown that can grow up to 15 metres tall and about 9 metres in diameter. As with the 'Thornwood', the crown of the 'Grayswood Ghost' has a very regular shape, making it particularly suitable as an avenue tree for wide streets and lanes. The bark is initially dark brown, but changes to an almost white colour after a few years, flaking only slightly. The leaves are a glossy dark green, providing a nice contrast to the white bark. In autumn, the leaves turn to yellow before falling. This tree grows well in semi-open paving, making it suitable for wide streets and avenues as well. It roots shallowly with many fine root hairs in the topsoil.

The original 'Grayswood Ghost' was located at Grayswood Hill, England, and propagation material was collected just before the tree died. In 1985, this material was named 'Grayswood Ghost' and distributed.
