

Cornus VENUS ('KN30 8')

Šírka	6-9m
Jesenné sfarbenie	Červená, Fialová
Tŕne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	6 (-23,3 do -17,8 °C)
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Cenné pre motýle
Použitie	stromy do nádob, strešné záhrady, malé záhrady, dvory
Tvar	Viackmeň

VENUS is a small tree with a broad oval to round crown that grows 6-9 m high and equally wide. Young trees are not very densely branched so they can be quite open and somewhat sticky. This disappears with older trees. It may take some years before the final crown shape is visible. Leaves ovoid to inverted ovoid, dark green. Turn red in autumn before falling off.

Flowers consist of a small globular head of flowers with four prominent flower bracts (bractae) around it. In VENUS, these bractae are huge. The entire flower can be more than 15 cm in diameter. The striking bractae are creamy white and, thanks to their size, particularly eye-catching. As the tree usually flowers profusely at a young age, it is a real eye-catcher. The small flowers at the centre are green and not very conspicuous. When flowering, the bracts turn slightly purplish-red. Flowering time May-June.

Originated from a cross between *Cornus kousa* and *Cornus nuttallii* at The State University of New Jersey (Rutgers), New Brunswick, New York, USA. Hardiness zone 6
