

## Nyssa sylvatica RED RAGE ('Haymanred')

<b>Šírka</b>	6-8m
<b>Jesenné sfarbenie</b>	Červená
<b>Tŕne</b>	Žiadny
<b>Jedovatosť</b>	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
<b>Spevnené plochy</b>	Netoleruje spevnené plochy
<b>Zóna odolnosti</b>	5a (-28,8 do -26,1 °C)
<b>Ostatná odolnosť</b>	Odolné mrazu (WH 1–6)
<b>Stromy pre zvieratá a hmyz</b>	Odolné mrazu (WH 1–6), Cenné pre včely (medonosné)
<b>Tvar</b>	Vysokokmeň, Vetvený

RED RAGE is a small tree up to about 10 m tall. The crown is broad pyramidal and eventually grows to about 6 m wide. The slightly irregular shape of the crown gives the tree a more informal character. The twigs are greenish brown and the older bark is dark grey and grooved. RED RAGE's leaves are slightly larger than those of the species *N. sylvatica*. They are deep green and distinctly glossy. In autumn, the leaves turn intense red for several weeks. The inconspicuous flowers appear around May-June. The tree produces only male flowers and thus will not bear fruit.

Red Rage, like other *N. sylvatica*, likes a moist, preferably loamy soil. The tree is suitable as a solitary or park tree, but also does well in larger gardens. Hardiness zone 5a.
